Lauren Berny, Adriana Conn, Mavis Gallo, Aubrey Green, & Shawn McWeenie

11/11/2021

The table above shows that both boys and girls who received free/reduced lunch tended to score lower on average in math and reading scores compared to boys and girls who did not receive free/reduced lunch.

sex	frl	math_mean	math_sd	rdg_mean	rdg_sd
boy	no	492.85	46.34	441.46	32.32
boy	yes	469.87	46.09	425.38	26.63
girl	no	501.21	45.96	448.54	34.52
girl	yes	477.51	46.30	430.80	27.42

Relation between teacher experience and math scores
 Seperate regression lines displayed by free/reduced price lunch status

The graph above shows teacher experience does not explain the difference in math scores and lunch status.
